## Conference Local Host

### Guizhou University

Guizhou University (GZU), one of China's '211 Project' universities, the national "Double First-Class" Initiative to develop world-class disciplines. The University offers a wide range of courses for 12 major disciplines such as literature, history, philosophy, science, engineering, agronomy, medicine, economics, management, law, education, and art. GZU has 40 colleges, with 33,604 full-time undergraduate students and 12,433 graduate students. It is home to 3,938 faculty members, including 2,856 full-time teachers. Of these, 503 are professors and 979 are associate professors. A total of 968 teachers hold doctoral degrees and 978 master's degrees.

## Co-host

### Huazhong University of Science and Technology

Huazhong University of Science and Technology (HUST) is a comprehensive research university located in Wuhan, China under the direct supervision of the Ministry of Education. It is a participant university of the former "985" Project in China, and also one of the first universities approved under the national "Double First-Class" Initiative, China's "Excellence Initiative" for institutions of higher education.

## Conference Sponsors

### Platinum Sponsor

### Johns Hopkins University Carey Business School

Grounded in the Johns Hopkins' legacy of excellence and research, Johns Hopkins Carey Business School shapes business leaders who seize opportunity, inspire change, and create lasting value. With campuses in Baltimore, Md. and Washington, D.C., Carey offers full-time, part-time, and online MBA and MS degree programs, and executive education programs for the global marketplace that are data-driven and built to compete in an ever-changing business world. And at Carey, we learn by doing. For more information, visit [carey.jhu.edu](http://carey.jhu.edu).

### Gold Sponsor

### University of Southern California Marshall School of Business

As a global business school in the heart of Los Angeles, Marshall is consistently ranked among the nation's premier schools. Marshall offers impressive international and experiential opportunities, backed by cutting edge research and industry engagement and supported by the uniquely powerful Trojan Network. The mission of the school is to deepen the knowledge and understanding of the critical problems faced in business, and to educate tomorrow's leaders who will address them.

### Gold Sponsor

### University of Maryland Robert H. Smith School of Business

The Robert H. Smith School of Business at the University of Maryland is located just 7 miles from the White House, at the heart of both business and power, with multinational corporations, influential NGOs, massive Federal enterprises and a burgeoning innovation community right in our backyard. The world-renowned scholars and professional faculty deliver practical knowledge grounded in principles and concepts that let students discover their passion, define their path as entrepreneurs, and explore the real world with a sense of purpose. Smith students learn foundational business principles, develop critical thinking skills, and gain expertise in important analytical tools and techniques. To do that, we offer undergraduate, online and on-campus business master's, full-time, part-time, online and executive MBA, and PhD degree programs, and non-degree and executive education programs.

## The Chinese Economists Society

The Chinese Economists Society (CES) is a non-profit academic organization registered in the United States. The CES strives to promote scholarly exchanges among members and contribute to the advancement and dissemination of economics and management sciences in China.

Over the years more than 3000 individuals have joined the CES from academia, research institutions, and other public or private organizations throughout North America, Asia, Europe, and other regions of the world. CES members are in leadership positions in government agencies, universities, research institutes, multinational firms, and international organizations including the People's Bank of China, the World Bank, and IMF. The CES is considered the most influential group that bridges academic exchanges in economics and management sciences between North America and China.

To promote scholarly exchanges among its members, the Society holds annual conferences, with its first conference held in Princeton, NJ in 1985. In order to promote market-based economic reforms in China, the Society has organized its Annual Conference in China since 1993, often jointly hosted with a Chinese university. The CES conferences have been widely attended by internationally renowned economists, senior government officials, and business leaders. The Society also organizes themed North America conferences. The CES conferences have had profound policy impacts on China's market-oriented transition and reforms as well as economic development strategy.

In 1989, the CES launched an English-language journal *China Economic Review* (CER), which in just a few years achieved worldwide circulation and became an influential academic periodical on China's economy. The CES became a member of the Allied Social Sciences Association (ASSA) in 1992 and has sponsored independent and joint sessions with other associations at annual ASSA meetings since then.

The CES is committed to serving its members and promoting the scholarly exchange between academic and research communities in North America and in China.

## FEC to Be Published by Wiley under the New Title

### *International Studies of Economics*

We are pleased to announce that Shanghai University of Finance and Economics has entered into a cooperation agreement with Wiley, the world's second largest publisher, regarding the publication of *Frontiers of Economics in China (FEC)*. Starting with volume 17 (2022), the journal will be published and promoted by Wiley, while the journal's editorial office continues to be based at the Institute for Advanced Research, SUFE.

We are confident that our partnership with Wiley, a world leader in publishing, research and education, will significantly enhance the publication quality as well as the visibility and reputation of the journal.

To reflect more accurately its position as a general interest journal aimed at a global audience, both parties agree after careful considerations that the journal will adopt a new title, *International Studies of Economics (ISE)*. To be clear, this change in title does not involve any change in the substance of the journal. The journal will have the same aim and scope, the same team of editors, the same Editorial Board, and the same Advisory Board.

#### Words from Editors

"The new partnership with Wiley, the world's second largest publisher, is an important milestone in our journey to become the most distinguished economics journal based in China. Leveraging Wiley's experience and resources as a global leader in research and education, this partnership will significantly enhance the publication quality as well as the visibility and reputation of the journal. Furthermore, the journal's new title, *International Studies of Economics*, reflects more accurately its position as a general interest journal aimed at a global audience. This will help attract more manuscripts on a broader range of topics, further enhancing the journal's publication quality. In our endeavor to build a leading economics journal, we look forward to your continued support."

ISE Editorial Team

#### Benefits for Publishing with ISE

**Global impact:** Articles published in this journal have been cited by scholars from over 300 institutions in more than 70 countries.

**Timely review process:** In the past five years, the average turn-around time from submission to first decision was 55 days.

**Gold Open Access:** All accepted manuscripts are immediately freely available to read, download and share.

**No submission fee and no Article Publication Charge:** The Article Publication Charge is waived for all accepted manuscripts.

### Journal Profile

*International Studies of Economics (ISE)* is a general interest journal in economics published by Wiley on behalf of the Institute for Advanced Research, Shanghai University of Finance and Economics. It was previously published by Higher Education Press under the title *Frontiers of Economics in China*, which was ranked as one of “The Highest International Impact Academic Journals of China” in 2016, 2019, 2020 and 2021. Issued quarterly, the journal is indexed in more than 10 databases including EBSCO-BSU, EconLit, ESCI, Gale, ProQuest, RePEc and SCOPUS.

The *ISE* welcomes submissions of theoretical and empirical papers from all fields of economics, particularly those with an emphasis on the Chinese economy and other emerging, developing or transition economies. While the journal is primarily interested in original research papers, it also welcomes submissions of opinion articles, literature surveys, and book reviews.
