01 Brief Introduction to Chinese Economists Society

The Chinese Economists Society (CES) is a non-profit academic organization registered in the United States. The CES strives to promote scholarly exchanges among members and contribute to the advancement and dissemination of economics and management sciences in China.

Over the years more than 3000 individuals have joined the CES from academia, research institutions, and other public or private organizations throughout North America, Asia, Europe, and other regions of the world. CES members are in leadership positions in government agencies, universities, research institutes, multinational firms, and international organizations including the People’s Bank of China, the World Bank, and IMF. The CES is considered the most influential group that bridges academic exchanges in economics and management sciences between North America and China.

To promote scholarly exchanges among its members, the Society holds annual conferences, with its first conference held in Princeton, NJ in 1985. In order to promote market-based economic reforms in China, the Society has organized its Annual Conference in China since 1993, often jointly hosted with a Chinese university. The CES conferences have been widely attended by internationally renowned economists, senior government officials, and business leaders. The Society also organizes themed North America conferences. The CES conferences have had profound policy impacts on China’s market-oriented transition and reforms as well as economic development strategy.

In 1989, the CES launched an English-language journal China Economic Review (CER), which in just a few years achieved worldwide circulation and became an influential academic periodical on China’s economy. The CES became a member of the Allied Social Sciences Association (ASSA) in 1992 and has sponsored independent and joint sessions with other associations at annual ASSA meetings since then.

The CES is committed to serving its members and promoting the scholarly exchange between academic and research communities in North America and in China.

05 Instructions for Session Chairs

Please familiarize yourself with the schedule prior to the conference, and check the posted program file at <https://www.china-ces.org/Conferences/> occasionally to see if your schedule has changed.

If you chair one of the Online Sessions (July 5, morning and afternoon China time):
Zoom links will be provided, and will be included in the final conference program. We expect to e-mail out the final conference program shortly before the conference starts. You can also find it on the conference website, click “Program” and then scroll down to the bottom and look for a link for conference program there.

If you chair one of the in-person sessions
The rooms will be equipped with a computer, projector, and screen. However, we recommend that chairs bring their own devices (such as laptops and presentation clickers) as a precaution.

Suggested time allocation (each paper for 20 minutes)
- With discussants: presentation (12 min), discussion (5 min), Q&A (3 min)
- Without discussants: presentation (15 min), Q&A (5 min)

The session chair and presenters are encouraged to discuss whether to have presenters discuss each other’s papers. If yes, then time allocation should be as above. Note that these discussants information will not be posted on the conference program.
- The session chair will track time and alert the presenter of remaining time at suitable intervals. The presenter must end his or her presentation once notified by the chair.

08 Introduction of the Co-organizers

Institute for Common Prosperity and Development of Zhejiang University

Established in June 2021, the Institute for Common Prosperity and Development (ICPD) at Zhejiang University is a premier center for research and a leading think tank. Focused on “development” and “sharing”, the ICPD aims to clarify the theory of common prosperity within the context of socialism with Chinese characteristics. The Institute actively tracks the progress of common prosperity across China, particularly in Zhejiang, and strives to provide insights and practical solutions through its rigorous research to promote common prosperity.

Since its inception, the ICPD research team has taken on numerous important projects commissioned by organizations like the Publicity Department of the CPC Central Committee and the National Development and Reform Commission. These projects focus on key issues such as the definition, goals, strategies, and institutional reforms for common prosperity, as well as reforms in fiscal policy, taxation, and social security. The team has also secured several major grants from the National Social Science Fund of China and key projects under Zhejiang Province’s Planning Office of Philosophy and Social Sciences.

The ICPD comprises four specialized research centers, each focusing on different aspects of common prosperity: the Research Center for Common Prosperity of Disabled Persons, the Zhejiang University-Huzhou City Research Center for Common Prosperity, the Future Regional Development Lab, and the Financial and Taxation Research Center for Common Prosperity.

To promote academic exchange, the ICPD and its affiliated research centers have hosted or co-hosted over 20 major conferences and seminars, along with more than 10 quarterly forums, academic salons, and scholarly sharing sessions.

School of Economics, Zhejiang University

Founded in 1929 as part of the former National Zhejiang University, the School of Economics at Zhejiang University (SOE ZJU) was re-established in June 1999 via the amalgamation of the economics faculties from Zhejiang University, the former Hangzhou University, and the former Zhejiang University of Agriculture. The rich history cements its reputation as one of China’s leading academic institutions for economic studies. The School adheres to Zhejiang University’s motto of “seeking truth and pursuing innovation”, with a philosophy centered around truth-seeking for state governance and the betterment of society. It offers a comprehensive curriculum across various domains of economics, integrating theoretical foundations with contemporary economic issues to foster a deep understanding of both domestic and global economic issues.

In the 2024 Times Higher Education (THE) Ranking, the Business and Economics discipline of Zhejiang University ranks 42th globally, among the top 5 in mainland China. As it continues to build on its historical strengths, SOE ZJU remains dedicated to advancing the frontiers of economic research and education, preparing its students to excel in a dynamic and interconnected world.

School of Public Affairs, Zhejiang University

The School of Public Affairs in Zhejiang University was created in 2005. It has developed into one of the best public affairs schools in China. The School aims to become a training base for future leaders with public spirit, an academic institution with high-quality research products and global reputation, and a leading think-tank with significant policy influence. The School has seven departments, including Department of Government, Department of Land Management, Department of Social Security and Risk Management, Department of Urban Development and Management, Department of Information Resource Management, Department of Agricultural economy and management, and Department of Political Science. The School has many programs. Our Master of Public Administration (MPA) program is one of the first several programs in China that are NASPAA-accredited. The school strives to improve its teaching quality, to strengthen its academic influence, and to promote engaged scholarship with ample significance in policy-making and governance. In the coming years, the School plans to continue raising its international profile, to develop into a first-class world-renowned public affairs school.
